OREGON DEPARTMENT OF FORESTRY

**INCIDENT MANAGEMENT TEAM**

<b>Incident Objectives</b>	1. Incident Name <b>Horse Prairie</b>	2. Date Prepared 9/3/2017	3. Time Prepared 1000
4. Operational Period (Date and Time) 9/3/2017      1800 - 0600 <b>Night Shift</b>			
5. General Control Objectives for the Incident (include Alternatives)			
<ul style="list-style-type: none"> <li>a. Fight fire aggressively and safely; maintain LCES at all times.</li> <li>b. Minimize fire size primarily through the use of direct tactics and a staffed night shift where possible.</li> <li>c. Keep fire South of Olalla Creek, West of Doe Creek, North of Middle Creek, East of Union Creek</li> <li>d. Maintain and build positive relationships with impacted landowners, public, and cooperating agencies.</li> <li>e. Maintain strict financial records and fiscal and equipment accountability.</li> <li>f. Act in a respectful and professional manner around the community.</li> <li>g. Protect tribal, cultural, archeological, and sensitive plant sites by coordinating with Resource Advisors.</li> <li>h. Provide for initial attack and assistance as requested on new and emerging incidents.</li> </ul>			
6. Weather Forecast for Period			
See attached weather forecast			
7. General Safety Message			
<ul style="list-style-type: none"> <li>*Anticipate and look for changes in weather and fire behavior</li> <li>*Initiate all actions based on current and expected fire behavior</li> <li>*Communicate hazards and mitigation measures to all personnel</li> <li>*Stay hydrated</li> </ul>

WHEN HARD HATS AND HARD HEADS CLASH

Often when we're talking about safety on the job, there are complaints about wearing hard hats. Comments we hear include: it's too hot in the summer, it's too cold in the winter, it's too heavy.

Remember that the slightest damage to any part of the brain can severely affect some other area of the body, either temporarily or permanently. The skull protects the brain. A hard hat protects the skull.

Tests have shown that in hot weather the temperature inside a hard hat is 12 degrees cooler than a baseball cap. Your head is kept cooler because ventilation is provided by air spaces between the shell and the suspension. The hat's surface reflects the heat rather than absorbing it. For cold weather, liners are available. Don't wear a hard hat over ordinary caps or hats in the winter.

The average hard hat weighs 13 ounces. The average head weighs 13 pounds. At one ounce of protection per pound of head, what a bargain!

If treated and worn properly, a hard hat can save your life. It can cushion a blow, protect against electric shock, chemical spills or hot materials. Check the shell for cracks and the suspension system for cracking, tearing or fraying. Don't paint, drill holes or use solvent on it because the shell will be weakened.

Finally, you may not need a hard hat if:

You have x-rays proving that you have a four-inch skull and equally thick protection around the other sensitive head and neck areas of your body.

Your doctor just told you that you have six months to live, and he forgot to mention it five months ago during your check-up.

You play Russian roulette for recreation every weekend.

You enjoy stopping large, heavy rocks pitched by graders and loaders with your head!

(Taken from: AZ Transportation Tech Transfer, April 1993. Originally prepared by the Washington Department of Transportation.)

## Safety Analysis of Tactical Actions (215A)

Incident Name: Horse Prairie				Date and Time Prepared: 9/3/2017				Operational Period: Night 9/3/2017			
TACTICAL HAZARDS	A/M	P	Q	S	T	Y	LCES MITIGATION				
Indirect Fireline		X	X	X	X		Establish LCES. Insure that communications between lookouts and line resources are maintained. Escape Routes are identified and reevaluated continuously.				
Downhill Fireline		X	X	X	X		Follow downhill line standards. Bring fire with you. Insure lookout can see entire area. Identify safety zones and escape routes before starting work. Use page 9 of Incident Response Pocket Guide. Establish LCES.				
Underslung Fireline		X	X	X	X		Cup trench. Post lookout that can see all areas of under slung line. Establish LCES.				
Mid-Slope Fireline		X	X	X	X		Insure that lookouts can see ALL area of mid slope line as well as areas upslope of mid slope line. Establish Trigger Points and reassess as fire or weather conditions change. Establish LCES.				
Frontal Assault		X	X	X	X		Identify thresholds for reassessment. Establish LCES.				
No Anchor Points		X	X	X	X		Find/construct safe, effective anchor before engaging. Establish LCES.				
Extreme Conditions (Spotting, Wind)	X	X	X	X	X	X	High potential given because of low live fuel moisture and high probability of ignition. Anticipate. Identify thresholds for reassessment, monitor weather. Establish LCES.				
Heavy Equipment	X	X	X	X	X	X	Do not work down slope below heavy equipment. Establish communications with operator. Post lookout for rolling debris. Be aware of loose soil and rock. Establish LCES.				
Air Ops: Multi Aircraft	X	X	X	X	X	X	Insure that all personnel are at least 500 feet from bucket or retardant drops. Utilize air attack. Establish LCES.				
Hazard Trees/Snags	X	X	X	X	X	X	Assess, Identify, Communicate, Isolate, Mitigate. Establish LCES.				
Hazardous Materials							Utilize the Incident Response Pocket Guide. Identify and isolate any suspected hazardous materials. Notify supervisor and warn others in area. Keep your distance. Establish LCES.				
Unburned Area Unknown Fires	X	X	X	X	X	X	High potential for re-burn in brush and conifers preheated by earlier burn. Blowdown areas keep a close eye on. Post lookouts. Watch for increase in burn activity. Monitor weather for change in RH and or wind conditions. Establish LCES.				
Transportation	X	X	X	X	X	X	Drive defensively with headlights on, seatbelts fastened. Stay to the right side of the road. Yield to uphill traffic and flaggers. Drive slowly and watch out for the other person. Establish LCES.				
Communication	X	X	X	X	X	X	Establish LCES. Insure that communications between lookouts and line resources are maintained. Escape Routes are identified and reevaluated continuously.				
Steep Terrain Gravity Hazards	X	X	X	X	X	X	Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose or wet soil and rock. Do not work below heavy equipment. Establish LCES.				
Environmental Hazards	X	X	X	X	X	X	Bees, Snakes, Bears and other animals are in the area. Carry medical kits for those with allergic reactions, do not harass or instigate any confrontations with animals, warn others of presence. Poison Oak - Preventative measures, locate, isolate, mitigate				
Structures					X	X	Follow page(s) 12 - 16 of Incident Pocket Response Guide. Establish LCES.				
Transfer of Command							Make sure you understand your assignment. Know who your supervisor is and who is working for you. Do not assume. Re-brief all resources.				
Span of Control	X	X	X	X	X	X	Adhere to Span of Control Guidelines-5.1. Ensure Overhead is sufficient for operation and identify chain of command. Ensure everyone receives a briefing. Retain control at all times.				
Falling Operations	X	X	X	X	X	X	Post road guards. Have a falling boss who can be in contact with crews working in the area. Use qualified Fallers.				
Power Lines				X	X		Watch for down power lines and poles. Identify, isolate and report. Notify supervisor and warn others in area. Keep your distance.				
I.A.	X	X	X	X	X	X	Follow the 10 and 18, LCES - before engaging, re-evaluate for each new start!

## ***Safety and Health Message***

**Hazard Trees** – Both dead snags and live green trees are one of the most common risks encountered on the fireline.

- Frequently survey you work area for potential hazard trees.
- Identify, flag off, communicate to other personnel; avoid area until mitigated.
- Remove flagging once the hazard has been removed.

**Fatigue** can manifest itself in a variety of forms. It is extremely important that individuals, crews, team members, support staff, etc, all become aware of the signs and symptoms of fatigue and recognize when intervention is necessary.

Supervisors must be informed of potentially dangerous conditions. The effects of fatigue can directly impact our abilities to:

1. Perform various tasks
2. Maintain situational awareness and a high degree of alertness
3. React appropriately in a timely manner and fashion
4. Retain a sharp memory and recollection of information
5. Efficiently process information and make sound decisions
6. Maintain a positive and supportive attitude
7. Control levels of frustration, irritation and aggression

### **Personal Protective Equipment:**

- Wear your hard hats
- Use your ear plugs when working around pumps
- Wear eye protection when mopping up, digging fire line, using a chainsaw; any activity that could result in foreign debris in your eyes.
- Wear your gloves when mopping up (except for cold trailing).
- Keep your sleeves down to protect your arms (burns, poison oak).
- Wear your chaps when using a chainsaw.

*"There are no great men, only ordinary men, who have met extraordinary challenges." (ditto for women)*

## Fire Weather Forecast

FORECAST NO: 08  
PREDICTION FOR: Friday Night Shift  
SHIFT DATE: September 3-4, 2017  
TIME AND DATE  
FORECAST ISSUED: 1300 September 3, 2017

NAME OF FIRE: Horse Prairie  
UNIT: Douglas Forest Protection Association

Incident Meteorologist: Mary Wister  
Cell #: 240-778-5303

---

### **Weather Discussion...Another Night of Smoke, Mild Temps, and Low Humidity Above 2000 Feet...**

The weather pattern has changed little since yesterday, and the temperatures and relative humidity will be similar to last night. Areas of thick smoke will reduce visibilities. The one change tonight compared to last night will be winds, as winds will mainly be light from the Northwest-North but will shift to the Northeast by early Monday morning.

---

### **Sunday's Weather:**

Areas of Smoke. Otherwise, clear skies. WNW winds 3-8 mph. Max Temps: 93-98 above 2000 feet and 85-90 below 2000 feet. Min RH: 12-18 percent above 2000 feet and 25-35 percent below 2000 feet.

---

### **Weather Forecast for Tonight:**

**Weather**.....Smoke lingering through the night. Otherwise, increasing high clouds.  
**Min Temperatures**.....65-70 above 2000 feet. 55-60 below 2000 feet.  
**Max Humidity**.....30-35 percent above 2000 feet. 60-70 percent below 2000 feet.  
**Winds (20FT)**.....Northwest-North 3-7 mph...becoming North-Northeast 2-5 mph around sunrise.  
**Winds (Ridgetop)**.....Northwest-North 4-8 mph...becoming North-Northeast 3-7 mph around sunrise.  
**Haines Index**.....5 (Moderate)  
**Chance of Rain**.....0%

---

### **Outlook For Labor Day:**

**Weather**.....Partly Cloudy and hot. Smokey.  
**Max Temperatures**...90-98 with hottest temperatures in areas with limited smoke.  
**Min Humidity**.....15-25 percent with lowest humidity in areas with limited smoke.  
**Winds (20FT)**.....North-Northeast wind 3-8 mph...becoming Northwest-North 3-8 mph after 1400.  
**Winds (Ridgetop)**.....North-Northeast wind 5-10 mph...becoming Northwest-North 5-10 mph after 1400.  
**Haines Index**.....5 (Moderate)...decreasing to a 4 (Low) late.  
**Chance of Rain**.....0%

---

### **Extended Outlook for Tuesday-Thursday:**

**TUESDAY**...Partly Cloudy. Cumulus buildups possible. Highs 87-95. Lows in the 60s. Northwest winds 5-10 mph.  
**WEDNESDAY through THURSDAY**...Partly Cloudy. A chance of showers and thunderstorms. Highs 78-86. Lows 55-65. West to Northwest winds 5-10 mph with gusts to 15 along ridgetops.

---

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 04	<b>TYPE OF FIRE:</b> Wildland
<b>FIRE NAME:</b> Horse Prairie	<b>OPERATIONAL PERIOD:</b> Sept. 3, Night Shift
<b>DATE ISSUED:</b> Sept. 3, 2017	<b>TIME ISSUED:</b> 1000
<b>UNIT:</b> DFPA, Central Unit	<b>SIGNED:</b> <u>Mike Haasken</u> <b>Typed/printed:</b> Mike Haasken

### INPUTS

**WEATHER SUMMARY:** .DISCUSSION... Smoke has played a huge role in temperatures and relative humidity the past couple of days, and smoke will linger over the region again today. Winds are light at the surface and aloft, and little mixing is taking effect. Therefore, it will be another day with temperatures and humidity that will be significantly different in the valleys where smoke will be prevalent through the day compared to the ridges where smoke will thin out during the day. Expect poor humidity recovery overnight on the ridges above 2,000'.

**TOPOGRAPHY:** Very steep ridge and valley topography with Table Mountain on the north and Cow Creek on the southeast part of the fire. Elevation ranges from 3,300' on Table Mountain to 800' in Cow Creek. Elevations increase above Cow Creek on the south end of the fire to 2,000' to 2,500'.

### OUTPUTS

#### FIRE BEHAVIOR

**GENERAL:** Fuels are timber with a brush and litter understory and grass and brush fields. Fire Behavior has been extreme with running, crowning and spotting up to ½ mile. Some runs have been downhill with predominantly northerly winds. A rotating column with fire whirls were observed in late afternoon on the Div. T burnout a couple days ago. The burn period has been 24 hours. Heavy smoke from this fire and others in southern Oregon have slightly suppressed temperature and slightly elevated relative humidity, but the fuel moistures are so low that fire behavior hasn't been affected, especially when the afternoon wind blows.

**Forecasted Indices: For Late Afternoon, early evening before shift change.**

**1 hour fuel moisture:** 3% (-3); **10 hour fuel moisture:** 4% (-2); **100 hour fuel moisture:** 8% (same); **1000 hour fuel moisture:** 10% (same)

**Energy Release Component:** 69 (+4); *similar to Stouts Creek and Cable Crossing ERC*

**Probability of Ignition:** Shaded due to smoke: 40%; Unshaded: 80%

**Expected Fire Behavior:** Expect moderate rates of spread and flame lengths with torching and possible crown runs and spotting up to ½ mile.

Timber Understory (TU 5): 8-10' flame length and Rate of spread of 10-15 ch/hr on a 40% slope (5 mph eye level wind).

Shrub (SH 2): 6' flame length and Rate of spread 10-15 ch/hr on a 40% slope (5 mph eye level wind)

**SPECIFIC: All Divisions should be aware of undetected spot fires outside the control lines.**

**Division Q:** Expect active fire behavior from yesterday's burnout; beware of possible shallow depth of burnout.

**Division S:** Indirect fire line above active burning from the main fire. Ensure LCES.

**AIR OPERATIONS:** Air operations may be hampered by heavy smoke. Sunset at Myrtle Creek is 7:46 PM tonight and sunrise tomorrow is 6:42 AM.

#### **SAFETY: MAINTAIN YOUR SITUATIONAL AWARENESS AT ALL TIMES**

Burning conditions may be extreme at shift change; Make sure you communicate with Day shift and know your LCES as it may be different than the previous shift on Divisions with active burning.

## Resource Protection on BLM Lands

### Horse Prairie Fire

- Avoid application of retardant, foam or other chemicals to waterways unless the fire is deemed a threat to human safety or private property.
- Avoid use of dozers in riparian areas.
- Notify Resource Advisor of location if cultural artifact items are found. Remember, removing cultural artifacts is illegal.
- Locate fire lines to minimize directing water into waterbodies or wetlands.
- There are several Spotted Owl and Marbled Murrelet Nest sites near the current fire area. When planning suppression activities in older forests work with READ's to reduce impacts.
- If drafting out of Olalla Creek, Cow Creek, Union Creek or Doe Creeks use 3/32" screens on draft intake. Screening material and zip ties can be picked up at supply.

## Logistics Service Hours

Shower 0900 – 2300

Kitchen 0430 - 0930  
1630 – 2130

Fire Cache/ 0600 – 2200  
Ground Support

Medical 0530 – 2130  
*(Staffed After Hours)*
